

Sociology of Science and Sociology of Knowledge: A Bibliography

Marcel Herbst
Automation

April 14, 2009

INTRODUCTION

The following is an automatically generated bibliography on the Sociology of Science and the Sociology of Knowledge, using data contained in the *ISI Web of Knowledge*, and covering the period of 1949 to March of 2009. The data was exported in the BiBTeX-format without editing: for some reason, typographical conventions in this bibliography (pertaining to the use of majuscules) are not standardized.

Items contained herein have to part (i) of the *ISI Web of Knowledge* (naturally), but (ii) they also have to have “topic” designations, namely, to belong to the topic of the Sociology of Science or the Sociology of Knowledge (items without these topic designations, irrespective of their content or orientation, will not show up in this bibliography, as the discerning reader will notice).
